EDUCATION

B.Tech in Computer Engineering, Pimpri Chinchwad College of Engineering	Expected May 2027
<i>SGPA: 8.9</i>	
HSC, Amrita Junior College, Pune	84.00%
SSC, Amrita Vidyalayam Nigdi, Pune	90.20%

EXPERIENCE

AR/VR Intern	Jun 2025 – Jul 2025
<i>Tamizan Skills</i>	<i>Remote</i>
- Built and validated a mobile AR Furniture Placement App (Unity, ARCore) end-to-end, implementing plane detection, raycasting, and pinch-to-scale/rotation gestures to stably anchor 3D models on real-world surfaces – testing and iterating across varied surface and lighting conditions. - Developed an AR Business Card (Vuforia image-target tracking) triggering a 3D avatar and interactive floating UI; independently scoped, prototyped, and validated the feasibility of marker-based tracking within a tight project timeline. - Documented technical approach, testing results, and design trade-offs for both prototypes to support future reuse and iteration.	
Google Student Ambassador – Gemini AI	Aug 2025 – Dec 2025
<i>Google Campus Leadership Program</i>	<i>Pune, India</i>
- Organized and led campus workshops and hackathons introducing students to generative AI tools and prototyping workflows, translating emerging technology into accessible, hands-on sessions. - Mentored students on integrating AI APIs into academic projects, fostering a learning-agile, experimentation-driven mindset through proactive cross-functional engagement.	

PROJECTS

Cultural Heritage AR App – Smart India Hackathon <i>Unity, Vuforia, ARCore, AR Foundation</i>	
- Sole developer and team lead; independently scoped, prototyped, and validated an AR feasibility concept – Vuforia image-target recognition to detect the Indian Rs. 20 note and render an accurate 3D model of the Ellora Caves directly over it, paired with contextual information panels. - Built and tested the APK end-to-end on a physical Android device under hackathon time constraints, delivering a working proof-of-concept demo and documented write-up of findings.	
AR Furniture Placement App <i>Unity, ARCore, AR Foundation</i>	
Prototyped real-time horizontal plane detection and raycasting to stably anchor multiple furniture models (sofa, chair, table) on physical surfaces; iteratively tested pinch-to-scale and drag-to-rotate gesture interactions across devices.	
AR Business Card <i>Unity, Vuforia</i>	
Built a marker-based AR prototype using Vuforia image targets; validated tracking reliability and interaction design across repeated test scans, triggering a 3D avatar animation and deep-linked UI buttons.	

SKILLS

Languages & Scripting: C#, C++, Python, JavaScript
Game Dev & Prototyping Tools: Unity 3D, Google ARCore SDK, AR Foundation (XR Toolkit), Vuforia, Android Studio
Documentation & Design: Figma, Canva, Adobe Premiere Pro, DaVinci Resolve
Core Competencies: Software Development Lifecycle (SDLC), Data Structures & Algorithms (DSA), OOPs, Git/GitHub

CERTIFICATIONS & ACHIEVEMENTS

Unity Learn – Create with AR: Markers and Planes (2025) – AR Foundation, image tracking, plane detection, and XR Interaction Toolkit.
Won Best Animations in AR at ITSA MVC Competition; built an immersive 3D animated experience in CoSpaces Edu.
Smart India Hackathon (SIH) Project Submission: developed and submitted an AR-based prototype tackling a cultural heritage problem statement.
Contributed to Project Tirtha (NISER & Dassault Systèmes) – captured a photogrammetry image dataset of a heritage temple site in Pune for 3D monument digitization; model featured on the Tirtha platform.
